

	 <p align="center"><b>No-Wax Floors Maintenance Training Card</b></p>		
<b>Cleaning Tasks:</b>		<b>Split!</b>	<b>Application Method</b>
Move any furnishings or items in the cleaning area. Setup wet floor signs.			
Remove any paper or larger debris from cleaning area wearing proper PPE.			
Dust Mop area to be cleaned with properly sized microfiber dust mop.			<b>Microfiber Dust Mop</b>
Use an automatic scrubber with diluted <i>Split!</i> Non Detergent Cleaner, <u>2-4</u> oz per gallon in the tank using a soft nylon brush or a white or red pad. OR:		<b>Split! Non-Detergent</b>	<b>Autoscrubber w/Pad or Brush</b>
Use a microfiber flat mop and bucket cleaning floor diluted <u>2-4</u> oz per gallon, while changing the used solution every 300-500 square feet.		<b>Split! Non-Detergent</b>	<b>Microfiber Flat Mop Tool, Floor Pad&amp;Bucket</b>
Repeat cleaning passes on floor areas that are stubborn.			
Wait until dry, then put back furnishings and remove wet floor signs.			
If possible, do not allow the use of any detergent at any time, as a single application will require another restorative cleaning to remove the residue			
Use microfiber cloths to wipe up any excess water/solution.			<b>Microfiber Cloths</b>
<b>Equipment Needed:</b>		<b>Notes:</b>	
<p>Always wear appropriate Personal Protective Equipment.</p> <ul style="list-style-type: none"> <li>• Microfiber Floor Tool, Cleaning Pads &amp; Bucket</li> <li>• Automatic Scrubber with White/Red Floor Pads or Soft Nylon Brush</li> <li>• Microfiber Cleaning Cloths</li> </ul>		<p>On No-Wax floors, problems are even more noticeable. Without finish on top to keep cleaning solutions out of the seams, surface scratches, and low spots in textured floors, detergent residue builds up in them. Black soil attaches to it. The seams appear as though they are separating, and light surface scratching becomes dark and visible. Textured floors just stay dirty. You will eliminate detergents from the cleaning operation with <i>Split!</i> Non-Detergent Cleaner.</p>	

	 <p align="center"><b>No-Wax Floors Restorative Training Card</b></p>		
<b>Cleaning Tasks:</b>		<b>Split!</b>	<b>Application Method</b>
Equip a rotary 175rpm floor machine with a white floor pad/soft nylon brush.			<b>175 RPM Floor Machine</b>
Dilute 12-16 oz per gallon with cold water		<b>Split! Restorative Cleaner</b>	<b>Mop Bucket Or:</b>
Apply the solution liberally to the floor by mop or using a solution tank.			<b>Solution Tank</b>
Allow the solution to dwell for five or ten minutes prior to scrubbing.		<b>Split! Restorative Cleaner</b>	
Scrub repeatedly with a standard 175 rpm floor machine equipped with a cleaning floor pad or soft bristle brush.			<b>Machine with Brush</b>
Use long-handled scrub brush (grit, for tile) for areas that cannot be reached by machine.			<b>Long Handle Scrub Brush</b>
Continue scrubbing each area until large amounts of detergent suds are released from the floor.			<b>175 RPM Floor Machine</b>
It is important to vacuum up the suds and soil prior to the slurry drying.			<b>Wet/Dry Vacuum</b>
Rinse with Water		<b>Water</b>	<b>Mop and Bucket</b>
<b>Equipment Needed:</b>		<b>Notes:</b>	
<p>Always wear appropriate Personal Protective Equipment.</p> <ul style="list-style-type: none"> <li>• 175 RPM Floor Machine or CAMEL</li> <li>• White/Red Pads or soft nylon brush</li> <li>• Wet/Dry Vacuum</li> <li>• Mop Bucket and Microfiber Mops</li> <li>• Microfiber Cloths(for spot cleaning)</li> </ul>		<p>Once detergent residues and attached soil are removed, the floors return to their original appearance! Seams appear to go back together, and surface scratches become invisible. Textured floors return to their original look. <i>Split!</i> Restorative Cleaner removes all of the detergent residue and attached soil from previous cleanings.</p>
