7`YU]b]b[Tasks:	Split!	Application Method
Move any furnishings or items in the cleaning area. Setup wet floor signs.		
Remove any paper or larger debris from cleaning area wearing proper PPE.		
Dust Mop area to be cleaned with properly sized microfiber dust mop.		A]WcZ]VYf` 8i ghA cd
Use an automatic scrubber with diluted Split! Non Detergent Cleaner in the tank using a soft nylon brush or a white or red pad. OR:	Split! Bcb! 8YHf[Ybh	5i hcgWi VVYf`k #DUX`cf 6fi g\
Use a microfiber flat mop and bucket cleaning floor, while changing the used solution every 300-500 square feet.	Split! Bcb! 8YHf[Ybh	A]WcZ]VYf : `UhA cd Hcc`Z: `ccf`DUX/ 6i W\Yh
Repeat cleaning passes on floor areas that are stubborn.		
Wait until dry, then put back furnishings and remove wet floor signs.		
Use microfiber cloths to wipe up any excess water/solution.		A]WcZ]VYf` 7`ch g
Equipment Needed:	Bch/g.	
Always wear appropriate Personal Protective Equipment. <ul style="list-style-type: none"> • Microfiber Floor Tool, Cleaning Pads & Bucket • Automatic Scrubber with White/Red Floor Pads or Soft Nylon Brush • Microfiber Cleaning Cloths 	Display wet floor signs until floor dries. <ul style="list-style-type: none"> • 2 Cup Measuring Cup • Putty Knife(for gum) • Split! Non Detergent Cleaner 	Once your epoxy or finished wood floor has been cleaned of existing detergent residue and soil it will be shockingly noticeable! Even textured, slip resistant epoxies appear as if they were just installed. If detergents are never again applied to the floor, it will always dry after cleaning to this like new appearance. If detergents are again applied to the floor, you will need to repeat the restorative procedure before starting a daily use Split! program.

Equip a rotary 175rpm floor machine with a soft brush or red pad		%t) `FDA : `ccf`A UW]bY
Dilute 16 oz per gallon with cold water	Split! Restorative	A cd` 6i W\YhCf.
Apply the solution to the floor by mop or through the use of the solution tank.		Gc`i h]cb`HUb_
Allow the solution to dwell for five or ten minutes prior to scrubbing.	Split! Restorative	
Scrub small areas with the rotary machine in the motion used as if stripping a floor.		A UW]bY`k]H` 6fi g\
Repeat mechanical agitation as if you were stripping multiple coats of finish.		
Use long-handled scrub brush (grit, for tile) for areas that cannot be reached by machine.	Water	@cb[`< UbX`Y`GWi V`6fi g\
Continue scrubbing until you have released as much detergent as you can, then move to another area.		
Do not allow dirty solution to dry. Use a wet/dry vacuum to remove the maximum amount of liquid.		K Yh#8fmJ UW`i a
If the floor cleanliness is acceptable, rinse with clear water and a clean mop.	Water	A cd` UbX` 6i W\Yh
If the floor cleanliness is not acceptable yet, repeat the above procedures.	Split! Restorative	
A restorative procedure of older grouted floors can take 2-3 applications.		
Equipment Needed:	Bch/g.	
Always wear appropriate Personal Protective Equipment. <ul style="list-style-type: none"> • 175 RPM Floor Machine or CAMEL • Soft Nylon Brush or Red Pad • Wet/Dry Vacuum • Mop Bucket and Microfiber Mops • Microfiber Cloths(for spot cleaning) • Long Handle Scrub Brush 	Display wet floor signs until floor dries. <ul style="list-style-type: none"> • Putty Knife for Gum • 2 Cup Measuring Cup • Split! Restorative Cleaner 	After the final rinse, allow the floor to dry. Then identify any missed or trouble areas. If a haze occurs, rinse the floor again being sure to use clean, clear water and wring your mop out well - microfiber string mops are very effective for both daily use and for detail rinsing. The use of a wet vacuum for initial pick up usually prevents this problem.
