

Gym - Astroturf Installed Maintenance Training Card

Cleaning Tasks:		Split!	Application Method
Remove any furnishings; pick up any large loose debris same cleaning area.			
Thoroughly dry vacuum the area to cleaned.			Smart Vac/Wide Area Vac
Scrub Astroturf with a dual cylindrical or carpet extractor machine.		Split! Non-Detergent	Dual Cylindrical/Extractor
Clean about a 300 square foot area at a time; vacuum OFF on first pass.		Split! Non-Detergent	Dual Cylindrical/Extractor
Clean with vacuum ON - second pass, or until you are satisfied with the cleaning level.		Split! Non-Detergent	Dual Cylindrical/Extractor
Pick up any left over solution in the Astroturf. Use extractor or wet vacuum.			Wet Vacuum/RRM
Walk the 300 square foot area you have cleaned. Check to see if you need re-cleaning.			
Continue with the same procedures in the next 300 square foot area.			
Note* - If you know what full size area you plan to clean that day, when dry vacuuming, vacuum that entire planned area first. solution.			
That way you do not accidentally run your dry vacuum over an area that you just got done wet cleaning.			
Equipment Needed:		Notes:	
Always wear appropriate Personal Protective Equipment. <ul style="list-style-type: none"> Smart Vacuum/Wide Area Vacuum Dual Cylindrical machine or/ Carpet extractor with brush Wet/Dry Vacuum or/ Restroom Rescue Machine 50'-75'-11 gauge extension cord 		Display wet floor signs until floor dries. <ul style="list-style-type: none"> Air Mover Machine Putty Knife for Gum 2 Cup Measuring Cup Split! Restorative Cleaner 	
All detergents, even properly diluted and properly applied leave behind a sticky residue. This residue builds up over time, attracting and trapping incoming soil and holding onto odors. Split! products work by splitting all organic non-solid molecules into its base material for easier removal without leaving detergent residue behind. Even decades of detergent and soil embedded on Astroturf can be removed, and regular machine cleaning with Split! afterward will keep you from ever doing restorative cleaning again! Remove odor absolutely by thorough initial restorative cleaning and then continue with regular cleaning maintenance.
