

Split!

Brush-n-Bonnet Pad Driver System

Brush Bonnet Pad Driver

For maximum low-moisture cleaning results. Provides the perfect amounts of agitation and moisture needed to split stubborn soils, stains and detergent residues.

Slotted Cleaning Pad

For the first of two steps. Synthetic blend to split/clean the soil, yet not absorb the split material. Has slots to allow brushes from driver to agitate soil.

Cotton Wiping Pad

For the second step. Cotton blend designed to absorb split material as it dries the carpet fibers. Over-sized to allow wiping of baseboards, etc.

The Brush-n-Bonnet System allows you to do restorative cleaning with low moisture benefits. Drying times of 15 to 20 minutes during maintenance cleaning is not unusual. Using the Camel floor machine along with *Split!* Carpet and Upholstery Cleaner will allow you to get great results avoiding quick re-soiling associated with the residue left from using detergent based cleaners.

The Camel will give you a heavy duty floor machine with a built in tank and a precise electronic spray device allowing you to finely control the amount of *Split!* solution you pre-spray. Then the Brush-n-Bonnet System with a Slotted Cleaning Pad will give you the mechanical action needed to lift the soil. Finally, using a 17" pad driver, the Cotton Wiping Pad will absorb the split material.

Both the Slotted Cleaning Pad and the Cotton Wiping Pad are Machine washable.
